Eternal Beauty of Marble

Marble, revered for centuries, stands as an epitome of timeless elegance and opulence. Each slab tells a unique geological tale, with veining that weaves its own narrative of natural artistry. Beyond its aesthetic allure, marble boasts exceptional durability, making it a cherished choice for flooring, countertops, and intricate architectural details. Its cool, smooth surface brings a touch of luxury to any space, creating an ambiance of refined grandeur. With a legacy that spans millennia, marble continues to be a symbol of enduring beauty.

About Decor

Decor design for ceramic tiles refers to the artistic and aesthetic elements added to tiles to enhance interior and architectural spaces. These decorative tiles go beyond plain surfaces by incorporating textures, patterns, colors, and motifs — turning walls and floors into design features.

🎨 What Is Decor Design in Ceramic Tiles?

Decor tiles (often called decorative tiles or accent tiles) are used to create focal points or thematic styling. These tiles are commonly used in:

Wall panels
Backsplashes

They add visual interest, texture, and style to spaces such as bathrooms, kitchens, living rooms, and commercial interiors.

High Quality

Fine Art Tile

The term "GVT PGVT" refers to ceramic tile that has been artistically adorned. They are commonly utilised as ornamentation in private residences, hotels, and other buildings. Depending on the material, they can serve both functional and aesthetic purposes.

Cement Laying On Tile

Joints

Fixing The Tile

Spacers + Laveller

Lavelling Wedges

After Lavelling Process
Leave Int For 8-10 Hrs.

Remove Wedges
Ones It Dry

Joint Grouting

Final Cleaning

Floor and Wall Installation

1. First spread the cement mixer onto the floor and wall substrate.
2. At the same time, apply the cement mixer onto the back of the slab with a tile trowel.
3. The recommended cement mixer must be spread over in one direction only.
4. Using a trowel and follow the same direction as previously applied to the back of the slab.
5. Being careful to maintain a minimum joint of 3mm.
6. Tab the slab with a rubber trowel for a complete fixing, ensuring the air is expelled.
It is recommended to start from the centre of the slabs and then move towards the edges.
7. Complete the laying operations using a suitable sealant, while keeping at least a 3mm joint through the use of spacers.
8. To make this task easier, use the special device for pulling over the slabs, available in the market.
9. Levelling wedges at each linear metre of the slabs are recommended.
10. After levelling process leave it for 8-10 hours, remove wedges once it gets dry.
