EASY TO CLEAN

Matte surface tiles are exempt from frequent cleaning due to the best concealing of smudges and stains.

CHEMICAL RESISTANT

Our chemical-resistant tiles provide great durability against abrasion, anti-skid qualities for worker safety, and an attractive appearance.

SCRATCH RESISTANT

When it comes to the scratch resistance feature, it will win the top spot. A Matte surface prevents scratches.

FROST RESISTANT

Frost-resistant tiles are not damaged by extremely low temperatures. tile has the ability to endure freeze/thaw temperatures without significant harm.

STAIN RESISTANT

The most appealing aspect of matt finish tiles is that they require no maintenance.

FLAZZ
Vitrified LLP Step into Elegance

DISCOVER THE ART OF PERFECTION

The Ceppodi Series in magnificent format of 600x1200mm comes in amazing colors reflecting understated earthy hues. The marvelous series reflects the reinvention of ceramics and contemporary architecture.

Unleash your imagination with each shade imbued with sheer elegance, sophistication and subtlety. The spellbound features and aesthetic charm make these slabs stand as the epitome of excellence.

Glazed Vitrified Tiles

Tile Body

The finest quality raw materials make up the resilient and robust tile body of Monolith tiles. The raw materials are ethically sourced and sustainably processed.

Engobe Layer

A highly opacious, fusible, and permeable engobe layer makes the second layer of the tiles of Monolith. The layer makes the tiles highly resistant to water absorption for longevity.

High Pigment Digital Printing Ink

The Monolith surfaces get their unique and versatile properties of the design, color, and more in this stage where digital printing is done on the glaze with high pigment ink for excellent results.

Glaze Layer

A high-quality glaze coating is added to the engobe layer of the Monolith tiles giving the tile properties of texture and shine and making them ready for design and color.

1200mm

ENJOY THE ARTISTIC
FREEDOM OF
EXCITING FORMAT

The 600x1200mm size gives creative freedom to use these surfaces in versatile ways, giving a clean and impeccable look that generates an impression of the vastness of spaces, compelling a majestic appeal that mesmerizes the beholder with admiration and respect for the craft.

Laying & Levelling

Base Structure

Cement Laying On Tile

Joints

Fixing The Tile

Spacers + Laveller

Lavelling Wedges

After Lavelling Process
Leave Int For 8-10 Hrs.

Remove Wedges
Ones It Dry

Joint Grouting

Final Cleaning

Floor and Wall Installation

1. First spread the cement mixer onto the floor and wall substrate.
2. At the same time, apply the cement mixer onto the back of the slab with a tile trowel.
3. The recommended cement mixer must be spread over in one direction only.
4. Using a trowel and follow the same direction as previously applied to the back of the slab.
5. Being careful to maintain a minimum joint of 3mm.
6. Tap the slab with a rubber trowel for a complete fixing, ensuring the air is expelled. It is recommended to start from the centre of the slabs and then move towards the edges.
7. Complete the laying operations using a suitable sealant, while keeping at least a 3mm joint through the use of spacers.
8. To make this task easier, use the special device for pulling over the slabs, available in the market.
9. Levelling wedges at each linear metre of the slabs are recommended.
10. After levelling process leave it for 8-10 hours, remove wedges once it gets dry.
